Education

New York University

New York, USA

Master of Science, Computer Engineering

Aug 2024 – May 2026

- **Key Coursework:** Machine Learning, Deep Learning, Reinforcement Learning, Big Data, Advanced Python for Data Science, Computer System Architecture, Applied Matrix Theory, Systems Engineering
- Migrated legacy Python CGI scripts to a modern **Django web application**, deployed using **Apache + mod_wsgi**, improving maintainability and runtime efficiency
- **Certifications:** Data Analysis with Python (IBM), Python Data Structures (University of Michigan), Google Data Analytics (Google), Data Visualization with Tableau (UC Davis)

Technical Skills

Programming Languages: Python, Java, C++, Go, SQL, JavaScript, TypeScript, Bash

Backend & APIs: RESTful APIs, Microservices, Django, Flask, Node.js, Express.js

Databases & Storage: MySQL, PostgreSQL, MongoDB, Redis

Systems & Infrastructure: Linux, Multithreading, Concurrency, Memory Management, Docker, CI/CD

Cloud & Developer Tools: AWS (EC2, S3, Lambda), Apache, Nginx, Git, GitHub, Unix Shell, VS Code

Testing & Reliability: Unit Testing, Integration Testing, Debugging, Logging, Performance Monitoring

Work Experience

INFOLOB

Remote

Software Development Engineer Intern

May 2025 – Aug 2025

- Architected a production-grade backend workflow on an MCP server integrating AWS Bedrock services
- Added automated fallback, retry, and recovery logic, raising task success by **33%** and uptime **40%**
- Sustained sub-minute response latency under heavy workloads through load balancing and system tuning
- Reduced inference costs by **28%** via optimized request routing and endpoint orchestration at scale

INFOTECH LABS

Hyderabad, India

Software Engineering Intern

May 2024 – Jul 2024

- Created interactive Power BI dashboards using DAX and SQL, accelerating insight delivery by **20%**
- Analyzed large sales and marketing datasets with SQL and Excel models, driving a **15%** KPI uplift
- Automated data pipelines by translating stakeholder needs into scalable reporting workflows
- Increased reporting accuracy and reliability by **30%** through validation checks and pipeline optimization

P99SOFT

Hyderabad, India

Software Development Engineer Intern

May 2023 – Jul 2023

- Delivered a full-stack Django–MySQL platform for client workflows, cutting processing time by **25%**
- Engineered scalable backend APIs with asynchronous task queues for efficient data ingestion
- Scaled system throughput to support a **50%** input increase without latency degradation
- Partnered with 10+ cross-functional teams to ship reliable, production-ready software solutions

Projects

Taylrd

Python, Flask

- Designed a Flask-based web application for resume and cover letter generation with LaTeX PDF output
- Optimized ATS keyword matching workflows, reducing resume customization effort by **90%**
- Enabled offline language model inference to achieve **95%+ keyword match accuracy** with low latency

SaaS Automation Builder

Next.js, TypeScript, Prisma, NeonDB

- Architected a multi-tenant SaaS automation platform with custom integration flows and a React-based UI
- Deployed CI/CD pipelines on Vercel with automated testing, maintaining **95% test coverage**
- Increased client productivity through scalable automation workflows supporting B2C SaaS use cases

Soundmix

React, Flask, Firebase

- Created a full-stack music web application using React and Flask, supporting **500+ users** with Firebase
- Applied emotion-based playlist personalization to boost user engagement and session duration by **30%**
- Scaled backend APIs and social sharing features to handle **2x traffic growth** without latency impact
