Education

New York University

New York, USA

Master of Science, Computer Engineering

Aug 2024 – May 2026

- **Key Coursework:** Machine Learning, Deep Learning, Reinforcement Learning, Big Data, Advanced Python for Data Science, Computer System Architecture, Applied Matrix Theory, Systems Engineering
- Migrated legacy Python CGI scripts to a modern **Django web application**, deployed using **Apache + mod_wsgi**, improving maintainability and runtime efficiency
- **Certifications:** Data Analysis with Python (IBM), Python Data Structures (University of Michigan), Google Data Analytics (Google), Data Visualization with Tableau (UC Davis)

Technical Skills

Programming Languages: Python, Java, C++, Go, SQL, JavaScript, TypeScript, Bash

Backend & APIs: RESTful APIs, Microservices, Django, Flask, Node.js, Express.js

Databases & Storage: MySQL, PostgreSQL, MongoDB, Redis

Systems & Infrastructure: Linux, Multithreading, Concurrency, Memory Management, Docker, CI/CD

Cloud & Developer Tools: AWS (EC2, S3, Lambda), Apache, Nginx, Git, GitHub, Unix Shell, VS Code

Testing & Reliability: Unit Testing, Integration Testing, Debugging, Logging, Performance Monitoring

Work Experience

INFOLOB

Remote

Software Development Engineer Intern

May 2025 – Aug 2025

- Owned a production backend service on an MCP server integrating **3+ AWS Bedrock components**
- Shipped resilient execution logic with retries and recovery, improving task success by **33%** and uptime **40%**
- Scaled request handling to sustain sub-minute latency at **2k+ tasks/day** under peak workloads
- Drove a **28%** reduction in inference costs through routing optimization and endpoint orchestration

INFOTECH LABS

Hyderabad, India

Software Engineering Intern

May 2024 – Jul 2024

- Delivered Power BI dashboards using DAX and SQL for **5+ business teams**, accelerating insights by **20%**
- Analyzed **1M+ sales records** using SQL and Excel models, driving a **15%** KPI uplift
- Built automated reporting pipelines supporting **daily refresh cycles** across multiple data sources
- Increased reporting accuracy by **30%** through validation checks and pipeline optimization

P99SOFT

Hyderabad, India

Software Development Engineer Intern

May 2023 – Jul 2023

- Shipped a full-stack Django–MySQL platform serving **multiple enterprise clients**, cutting latency by **25%**
- Designed scalable backend APIs with async task queues processing **10k+ records/day**
- Expanded system throughput to support a **50%** traffic increase without performance regression
- Coordinated with **10+ cross-functional teams** to deploy reliable, production-ready services

Projects

Replicated Key-Value Store

C++, TCP/IP

- Built a replicated key-value storage system using sockets to support **1000+ concurrent clients**
- Defined a primary–replica consistency model with heartbeat detection and sub-**2s** leader failover
- Optimized read and write paths to sustain **millisecond-level latency** under sustained load

SaaS Automation Builder

Next.js, TypeScript, Prisma, NeonDB

- Architected a multi-tenant SaaS automation solution with **10+ integrations** and a React interface
- Established CI/CD workflows on Vercel with automated testing, achieving **95% test coverage**
- Enabled scalable automation pipelines supporting **1000+ workflows** across B2C SaaS use cases

Distributed Caching System

Java, Python, Redis, Docker, Kubernetes

- Engineered a distributed caching layer with replication and invalidation across **5+ nodes**
- Served high-throughput cache operations at **10k+ requests/sec** using REST APIs under load
- Orchestrated containerized services with Kubernetes to maintain **99.9% availability**
